

● Oxygen Compressor Check Valve

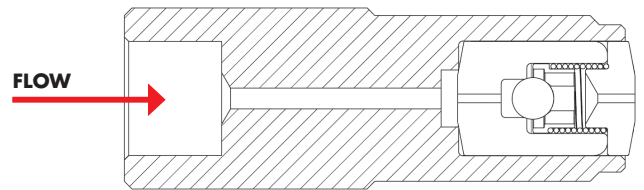

For compressor and other high pressure applications

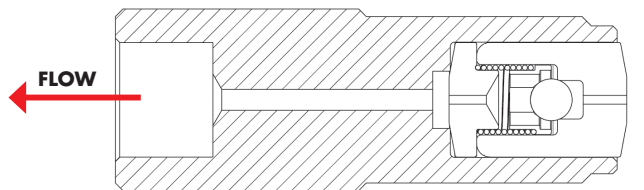

- Interchangeable with current compressor check valves and easily retrofitted to existing systems
- MAWP: Up to 10,000 psia / 69 MPa / 690 bar
- Brass or Monel™ housing
- Reduce compressor operating costs through improved mechanical efficiency and performance

● Inlet Configuration:

● Outlet Configuration:

● Ordering Code

Include Option(s) from table to left:

OC-004-

Configuration _____

Housing Material _____

External Fitting _____

Compressor Interface _____

Please specify details for any custom requirements.

Feature	Option	Description
Configuration	I	Inlet
	O	Outlet
Housing Material	B	Brass
	M	Monel™
External Fitting	1	Standard HP4 Female high pressure fitting
	C	Custom – Please specify
Compressor Interface	1	3/4" UNF Thread
	C	Custom – Please specify
Overall Length	...	To suit existing system
Overall Diameter	...	To suit existing system
Mass*	...	110 g (0.2 lb)

* Including housing
